

# melano WHITENING

## PROTOCOL FOR melano WHITENING

- *Cosmetic program formulated to attenuate and to eliminate coetaneous spots of melanic origin located at epidermal level, with a high depigmentating power.*
- *Act on the cells responsible for the skin coloration, reducing the production of excess color and very effective in the elimination or decrease of spots, becoming the coetaneous coloration uniform.*
- *The **melano WHITENING** is based on the inhibition of tyrosinase, a basic enzyme in the melanin formation process.*
- *Several of the substances present in the **melano WHITENING** formula actuate by blocking this enzyme, or even by inverting the metabolic process of the transformation chain.*

### **FIRST PHASE** (professional procedure –treatment room):

- *Prepare the skin for the treatment:*
- *Apply the Degreasing Solution*
- *Apply the Pre-Treatment Solution*
- *Apply the **melano WHITENING** mask.*

### **SECOND PHASE**

#### **AT THE PATIENT'S HOME**

- *Patient removes the mask with water after 12 hrs, applying moisturizer.*
- *Every morning –dry skin requires an application of Hydraface and sunscreen, tonic in the case of greasy skin.*

#### **MECARE –DAILY–:**

- *Cleanse and tone at morning and night with Cleansing Lotion*
- *Apply Hydraface (apply during the day, special ever you feel the skin dry or tingling)*
- *Apply SPF 50+ (morning and during the day –every 2 hours)*
