

## Serum C

- **FACE:**
  - Dab a small drop gently on forehead then cheeks and chin, spread evenly around the entire face & only add more if insufficient to cover the entire area. (ONLY 1 DROP IS SUFFICIENT TO COVER FULL FACE)
  - Allow to penetrate for a few minutes before applying other products. If it feels oily or sticky, too much was applied.
  - Better results if use immediately before sunscreen
  - Can be used twice a day.
- **BODY:**
  - **Mix several drops of serum C with your Body Lotion. Can also be mixed with your facial lotion.**
  - **Could be applied on wet or damp skin.**

**In morning time apply it before sunscreen for better absorption of sunscreen.**
